Data Structures Practical

Practical - VI

Roll No. :S040	Name:Aditya Sopte
Class :SY IT	Batch :
Date of Assignment :29-07-2026	Date/Time of Submission :29-07-2026

PART – A : Thoery

A **Binary Tree** is a non-linear data structure in which each node has at most two children: a **left child** and a **right child**.

Tree Traversal is the process of visiting every node of a binary tree exactly once in a specific order. The three basic traversal methods are:

- **Pre-order Traversal (Root → Left → Right):** Visits the root node first, then the left subtree, and finally the right subtree.
- **In-order Traversal (Left → Root → Right):** Visits the left subtree first, then the root node, and finally the right subtree.
- **Post-order Traversal (Left → Right → Root):** Visits the left subtree first, then the right subtree, and finally the root node.

These traversal techniques are commonly used for searching, displaying, and processing the nodes of a binary tree. They are usually implemented using **recursion**.

PART – B : Question

Tree Traversal: Write a program to:

- a. Implement pre-order,
- b. in-order,
- c. Post-order traversal of a binary tree.

CODE:

```

class Node:
    def __init__(self, item):
        self.left = None
        self.right = None
        self.val = item

def inorder(root):
    if root:
        inorder(root.left)
        print(str(root.val) + "->", end="")
        inorder(root.right)

def postorder(root):
    if root:
        postorder(root.left)
        postorder(root.right)
        print(str(root.val) + "->", end="")

def preorder(root):
    if root:
        print(str(root.val) + "->", end="")
        preorder(root.left)
        preorder(root.right)

root = Node(1)
root.left = Node(2)
root.right = Node(3)
root.left.left = Node(4)
root.left.right = Node(5)

print("Inorder Traversal")
inorder(root)

print("\nPostorder Traversal")
postorder(root)

print("\nPreorder Traversal")
preorder(root)
print("\n\nAditya Sopte S040")

```

OUTPUT:

```

== RESTART: C:/Users/IT
Inorder Traversal
4->2->5->1->3->
Postorder Traversal
4->5->2->3->1->
Preorder Traversal
1->2->4->5->3->

Aditya Sopte S040
